

# ATM/ITM/INTELLIGENT

# KIOSK CAPTURE

Through an API integration with your existing ATM/ITM/Intelligent Kiosk partner, you can easily push members' check deposits directly into TranzCapture, keeping all deposited items together. ATM/ITM/Intelligent Kiosk Capture offers end-to-end convenience to your members and streamlined operations for your credit union.

## BENEFITS

- + Increase member convenience with decreased branch traffic costs.
- + Consolidate back-office reporting and research.
- + Integrations are in place with select versions of Diebold and NCR ATMs, Glory Intelligent Kiosks and NCR ITMs.

## FEATURES

- + Direct access to the ATM/ITM API eliminates the need to purchase and install expensive consolidation software and hardware.
- + Images are captured directly into the TranzCapture system with no back-office staff to balance and create outgoing X9 files for collection.
- + Automated secure image files are transmitted for real-time processing.
- + System provides configuration management features to assign and approve deposit limits online within the TranzCapture platform.

## About TranzCapture

Corporate One uses TranzCapture LLC, a credit union service organization, as the platform for all its item processing services. TranzCapture streamlines work through its web-based platform that offers consolidated administration and processing.

Users access TranzCapture through Members Only, Corporate One's online member portal, and conduct all item processing work, including verifying items, viewing archives and running reports from one consolidated platform. Members can count on robust reporting, real-time duplicate item and batch detection and same-day access to images in a seven-year archive.

## How Does it Work?

Through TranzCapture's API (Application Programming Interface), the ATM/ITM/Intelligent Kiosk Capture services enable a credit union's member to make check deposits at image-enabled automated teller machines (ATMs) and interactive teller machine video terminals (ITMs). Image files are transmitted for processing in real-time. Our ITM solution employs an interface with the ITM machine that directs images into TranzCapture for processing and to utilize risk mitigation thresholds.
